Beginning Tuesday, March 17, 2020, the Wright-Patterson Medical Center will begin limiting entry by patients into the hospital using two designated entry points. This is being done to ensure the continued health and safety of our patients, staff and visitors. To continue normal operations and patient care, the 88th Medical Group will also institute precautionary screening for patients, staff and visitors before entering the WPMC.

The new entry procedures for patients and visitors are as follows: Patients and visitors will enter through the Atrium or Clinic/MRI Entrances where a series of screening questions will be asked. Staff will enter through the designated *Staff BADGE Only* entrances, in the back of the MTF, after completing their screening requirements.

Patients should plan to arrive early for their scheduled appointment as there could be delays.

Currently, all routine appointments and other services such as pharmacy, lab, radiology testing, etc. are proceeding as scheduled; however, we are already working plans to curtail certain services as early as the middle of this week. Patients will be called directly if any scheduled appointments or elective surgeries are going to be rescheduled. We are adding more virtual appointments to the schedule to assist with your care. We apologize for any inconvenience these changes may cause but we appreciate your patience and support as we work through the COVID-19 issues together.
