Interactive Inferential Statistics Flowchart

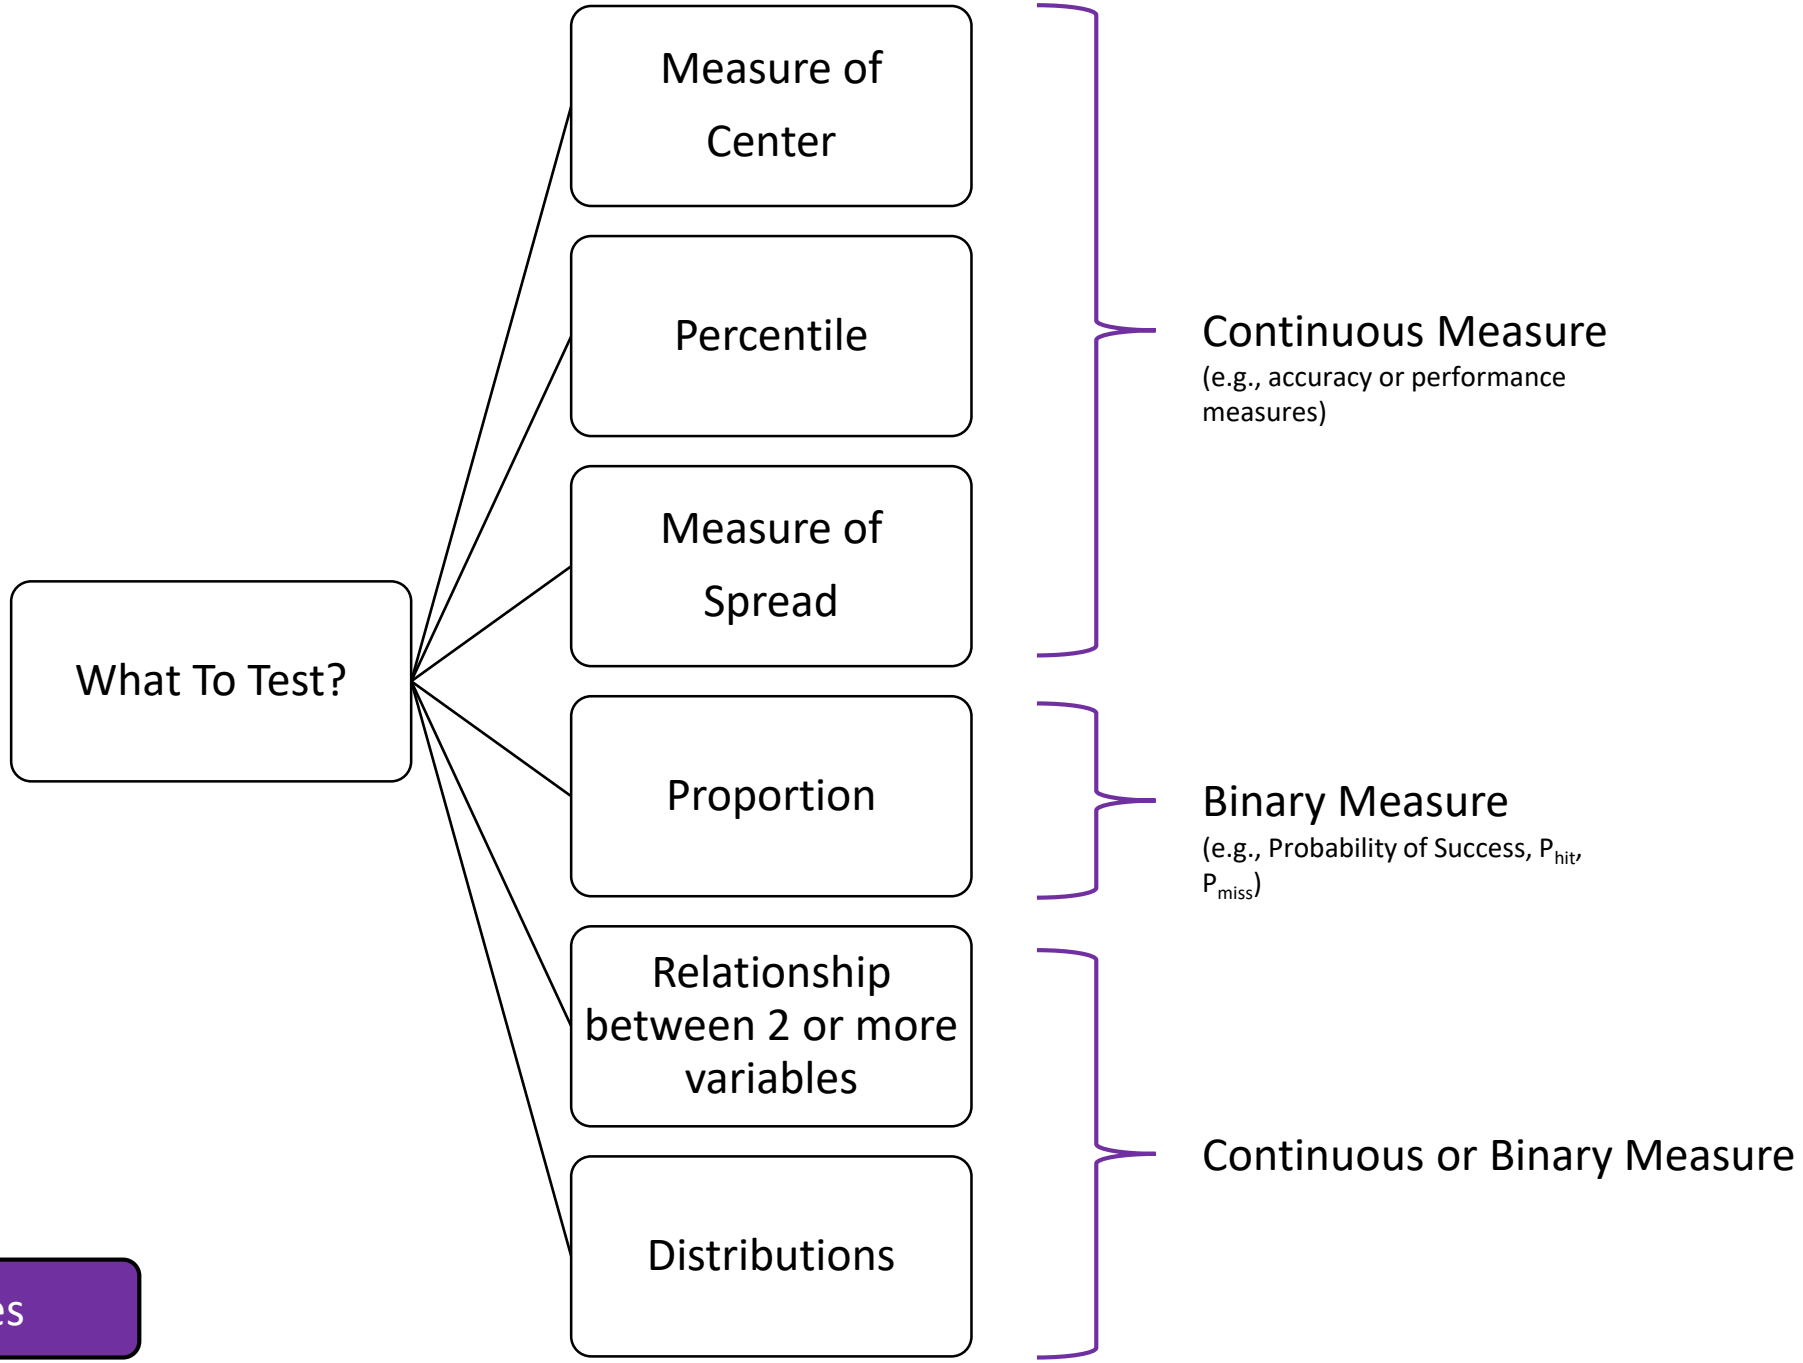
Version 1.0

Last Updated: 8 January 2019

Directions

- View this in “Presentation Mode” in MS PowerPoint
- Click the “Begin” button below to start
- Click the desired measure of interest (e.g., Measure of Center)
- Follow the flowchart to arrive at the recommended inferential statistical method
- Use the  button to return to the previous slide
- Use the  button to return to the starting page
- Questions? Contact the STAT COE at COE@afit.edu

Begin



What To Test?
Measure of Center
Percentile
Measure of Spread
Proportion
Relationship between 2 or more variables
Distributions
Continuous Measure
(e.g., accuracy or performance measures)
Binary Measure
(e.g., Probability of Success, P_{hit}, P_{miss})
Continuous or Binary Measure

References

Measure of Center
