Air Force Institute of Technology  
Research Report 2011  
Foreword

Research programs at the Air Force Institute of Technology (AFIT) are an integral component of our graduate education mission, while addressing both immediate and long-term warfighter needs. AFIT’s Advanced Navigation Technology Center, Center for Cyberspace Research, Center for Directed Energy, Center for Operational Analysis and other research groups are focused on priorities identified in the United States Air Force Chief Scientist’s report Technology Horizons, A Vision for Air Force Science and Technology During 2010-2030, and the Air Force Science & Technology Strategy 2010 signed by the Chief of Staff and Secretary of the Air Force.

AFIT maintains active partnerships with our Air Force’s organizations and operational communities as well as the DOD and other federal agencies to maximize the contributions of our research programs to national needs. Our faculty and students also engage in collaborations with researchers at universities throughout the nation to advance the state-of-the-art in a variety of disciplines. AFIT cooperates with commercial enterprises to ensure timely transfer of new technology to US industry through Cooperative Research and Development Agreements (CRADAs) whenever appropriate.

This Research Report is prepared annually to summarize the significant contributions of this institution; to solicit continued involvement and support from our Air Force, DOD, and other federal partners; and to encourage new sponsors to participate in AFIT’s research programs. AFIT welcomes new opportunities to engage in research projects that are of mutual interest to our customers, faculty, and students. Additional information is available at http://www.afit.edu/en/enr/index.cfm.

Another avenue for educational and research collaboration with the Graduate School of Engineering and Management is through association with one or more of AFIT’s Research Centers. A brief listing of each Center’s research or educational areas of emphasis appears below. Please contact the Centers directly (see Ch. 6) or visit http://www.afit.edu/research.cfm for further information.

- The Advanced Navigation Technology (ANT) Center is a forward-looking research center seeking to identify and solve tomorrow’s most challenging navigation and autonomous and cooperative control problems by focusing on three research thrusts: autonomous and cooperative systems, non-GPS precision navigation, and robust GPS navigation/NAVWAR.

- The Center for Directed Energy (CDE) is dedicated to Air Force and DOD research in high energy lasers (HELs), high power microwaves (HPMs), and their enabling technologies. The Center is an advocate for transitioning these systems to the battlefield through vigorous scientific and engineering research, graduate education programs and diverse consulting activities.

- The Center for Cyberspace Research (CCR) is one of the National Security Agency (NSA) and Department of Homeland Security’s designated Centers of Academic Excellence in Information Assurance Education (CAE/IAE). CCR is also a National Science Foundation Cyber Corp institution. CCR’s objectives are to provide cutting-edge offensive and defensive research solutions for cyberspace and cyber security applications and produce a cadre of technically educated leaders for the DOD and federal Government. In June 2008, the CCR was designated the Air Force’s Cyberspace Technical Center of Excellence.

- The Center for Technical Intelligence Studies and Research (CTISR) is focused on Air Force, Department of Defense and the U.S. Intelligence Community (IC)’s scientific, technical and operational activities through graduate research programs. Activities include remote sensing technologies, signature and algorithm development for target detection, clarification, and tracking, and advanced biometrics for force protection. CTISR is also a national resource for educating a new generation of intelligence professionals through the Advanced Geospatial Intelligence (AGI) graduate certificate program. This center was renamed from the Center for MASINT Studies and Research (CMSR) to the present name effective 1 July 2011.

- The Center for Operational Analysis (COA) directs defense relevant research and timely technology transfer, providing approaches and solutions to current and future operational and resource issues while developing critical and forward thinking analysts, managers, and leaders.
**Additional AFIT Center**

The [Air Force Center for Systems Engineering (AF CSE)](http://www.afit.edu/cse/) is a directorate within AFIT that is external to the Graduate School of Engineering and Management. AF CSE is the recognized Center of Excellence for Systems Engineering (SE) within the Air Force and the Department of Defense. The mission of the Center is to shape the future of systems engineering with the goal of improving our ability to deliver war-fighting capabilities. We accomplish this by conceptualizing new processes, practices, tools, and resources through research, education, and consultation. Additional information about AF CSE can be found at [http://www.afit.edu/cse/](http://www.afit.edu/cse/). AF CSE is included here for completeness, but no AF CSE data is included in the remainder of this report.

An AFIT Research Assessment Questionnaire, shown on the following page, was sent to each sponsor of a Master’s Thesis and Doctoral Dissertation project completed during FY 2011 to determine the project’s contribution, significance and cost avoidance. Detailed results of the questions asked are shown in Table 3.1. The data in this table are based on 81 questionnaires returned out of the 282 questionnaires mailed.

RESEARCH ASSESSMENT QUESTIONNAIRE

TO:

Thank you for sponsoring the AFIT thesis or dissertation listed below. AFIT is working hard to keep its research focused on defense technologies of interest to the Air Force and to the nation.

Title:

Student Author:   Designator:

Faculty Advisor:

Date of Graduation:

Please help us determine the value and contribution of this research to your organization’s mission by answering the questions below:

1. Did this research contribute to a current task or goal of interest to your organization?  Y / N
2. Would you have completed this work if AFIT had not done it?  Y / N
3. Regardless of your answers above, how would you rate this work?  
   Highly significant
   Significant
   Slightly significant
   No significance

4. If AFIT had not done this work, please estimate what it would have cost your organization to perform it, either by using in-house resources or by contract.* Man-Years ____ $ _________________
   *Please note that typically an MS thesis requires 0.5MY of the student’s time and one month of the faculty advisor’s time. For a PhD dissertation the numbers are 2MY for the student and 4 months for the advisor.

5. Please describe how this thesis impacted your area of responsibility, or provide other comments you would like to make. (For example, have particular changes been made or planned as a result of this work? What was/will be the impact of the changes?) All comments will be shared with the faculty advisor, the academic department, and AFIT administrators as appropriate.

You may mail this to AFIT/ENR, 2950 Hobson Way, Wright-Patterson AFB OH 45433-7765, or fax it to (937) 656-7139 (DSN 785-7139), or just e-mail your answers (only) to 1 to 5 to research@afit.edu.
If you use e-mail, please include the designator above so that we might identify the project.
Thank you.

3.2. RESEARCH AND CONSULTING OUTPUT MEASURES

There are measurable indicators of AFIT’s contribution to the engineering and scientific community and AFIT’s success in staying well informed of technical possibilities and scientific opportunities. These indicators include the number and quality of technical publications accepted by the editors of journals; the number of presentations accepted for regional, national and international conferences; the number of sponsor funded research projects conducted; and finally, the number of student Graduate Research Papers, MS theses, and PhD dissertations completed and submitted to the Defense Technical Information Center. For FY11, these output measures are shown in Tables 3.2a and 3.2b for the Departments and Centers, respectively.

3.3. RESEARCH AND CONSULTING SPONSORSHIP

As part of an Air Force institution, the faculty members of the Air Force Institute of Technology focus their research on current problems as well as future systems of the Air Force and other DOD organizations. Evidence of this focus is that 88% of all theses, dissertations, and graduate research papers listed in Table 3.2a are externally sponsored by Air Force, DOD and Government agencies. In addition, most of the research projects and consultations are carried out for Air Force and DOD units. The data are summarized in Table 3.3 and Figure 3.1.

3.4. OUTSIDE FUNDING FOR THE GRADUATE SCHOOL OF ENGINEERING AND MANAGEMENT

Many of the Graduate School of Engineering and Management’s theses and research projects completed under faculty supervision (sponsored or unsponsored) are funded in part by other Air Force, DOD and government units and agencies. Often, this funding results from collaboration between faculty and thesis sponsors and occurs when the research project can be leveraged by the purchase of equipment or services not otherwise available. Tables 3.4 and 3.5, and Figure 3.3, summarize outside funding for FY11, and Figure 3.2 summarizes the past ten fiscal years of outside sponsored funding.
